KUBECON NA 2026 · KUBEVELA

One interface to rule them all

One application.yaml

Any IaC (ACK, Crossplane, ...)

Any Cloud (AWS, GCP, ...)

```
components:
  - name: product-images
    type: bucket-aws-cue
    properties:
      name: product-images
```

PROPERTIES
Mine. Never edited.

TYPE
The platform's choice, swapped per stage.

APP CODE
One ObjectStore interface. Same image everywhere.

FOUR STAGES · ONE THING CHANGES EACH TIME

`aws-cue`	AWS S3 via Crossplane, CUE
`aws-defkit`	AWS S3 via Crossplane, **DefKit (Go)**
`aws-ack`	AWS S3 via **ACK**, DefKit
`gcp-defkit`	**GCP Cloud Storage** via Crossplane, DefKit

Try it at the booth

Approve a stage in VelaUX. Watch its bucket appear.
